

# GANESH PARASURAMAN

Enterprise Engineering Leader | Cloud-Native Modernization & AI Enablement

+1 (469) 207-6360 ganesh.parasuraman@gmail.com Dallas, Texas linkedin.com/in/ganeshparasuraman/

## WORK EXPERIENCE

### DIRECTOR, SOFTWARE ENGINEERING

Peerislands, Dallas, US | Oct. 2019 – Present

- Led the development of AI-powered Copilot coding agents to modernize airline traffic control and crew maintenance platforms from legacy on-premise systems to cloud-native architectures, reducing delivery timelines from 8 months to a few weeks through AI-driven analysis, automated testing, and deployment acceleration.
- Directed modernization initiatives for enterprise operational systems involving microservices, streaming platforms, cloud-native architectures, and AI-assisted engineering workflows.
- Designed and implemented a data mesh platform processing 1.5M+ files for logistics and operational analytics while building AI-enabled analytics solutions using Databricks, Unity Catalog, and Genie AI for business self-service reporting.
- Led modernization of healthcare revenue cycle management platforms using configuration-driven data ingestion, analytics, and reporting pipelines.
- Architected high-throughput streaming systems supporting 100K+ connected devices using Kafka Streams and Kotlin, reducing end-to-end processing latency by 40%.
- Built AI-enabled analytics and orchestration platforms leveraging Apache Flink, MongoDB, Polars, and LLM-driven transformation frameworks for real-time decisioning and operational intelligence.
- Established scalable cloud-native engineering standards covering CI/CD, observability, platform reliability, deployment automation, and distributed system governance.

### SENIOR ARCHITECT

Mindtree, India | Sept. 2018 – Sept. 2019

- Designed a low-code machine learning orchestration framework that accelerated data science experimentation and streamlined model delivery workflows.
- Implemented real-time IoT analytics and asset tracking platforms with integrated operational dashboards for logistics and industrial operations.
- Delivered scalable analytics architectures supporting telemetry ingestion, streaming analytics, and operational visibility.

### TECHNICAL ARCHITECT

Cognizant, India | Jun. 2016 – Oct. 2018

- Delivered cloud optimization and zero-downtime migration initiatives resulting in sustained infrastructure cost reductions of USD 25K per month.
- Built mobility and logistics platforms for heavy equipment rental organizations, reducing pickup times by 80% through integrated scheduling, driver mobility, and fleet tracking solutions.
- Engineered predictive maintenance and real-time supply chain visibility systems leveraging GCP IoT Core and BigQuery.
- Developed digital operational workflow automation platforms integrating mobility, analytics, and scheduling ecosystems.

## SUMMARY

- Engineering and technology leader with 19+ years of experience leading cloud modernization, AI-enabled transformation, and large-scale distributed systems across airline, healthcare, logistics, IoT, and mobility domains.
- Extensive experience modernizing legacy platforms into cloud-native microservices architectures and building scalable real-time operational platforms.
- Deep expertise in streaming systems, IoT-style platforms, and mission-critical operational environments.
- Proven track record delivering enterprise SaaS, streaming analytics, AI-enabled engineering platforms, and data modernization initiatives across globally distributed teams.
- Hands-on engineering executive with strong expertise in architecture transformation, operational reliability, troubleshooting, and platform modernization.
- Experienced collaborating with executive leadership, product organizations, and cross-functional engineering teams to align technology strategy with business outcomes, operational excellence, and innovation roadmaps.

## EDUCATION

Master of Science (MS) – Management Information Systems  
University of Illinois at Chicago, USA | 2010

Bachelor of Engineering (BE) – Electronics & Communication Engineering  
Bharathidasan University, India | 2004

## CERTIFICATIONS

Developer Professional & Developer Associate (C100DEV)  
MongoDB | 2021

Certified Kubernetes Application Developer (CKAD)  
The Linux Foundation | 2022

Associate Developer for Apache Spark 3.0  
Databricks | 2022

Professional Cloud Architect  
Google | 2021

TECHNICAL LEAD

Lister Technologies, India | Nov. 2014 – Jun. 2016

- **Legacy Systems & API Architecture:** Re-engineered 250+ legacy J2EE services into resilient RESTful microservices, instituting enterprise API standards and significantly improving system robustness.
- **Cloud-Native Platform Architecture:** Constructed a scalable, multi-tenant cloud-native platform for hospice care operations using MVVM architectural patterns, containerised deployments, and automated CI/CD pipelines on AWS.

PROJECT ARCHITECT

IBS Software, India & Australia | Apr. 2011 – Oct. 2014

- Contributed to the technology roadmap for airline and passenger services platforms.
- Designed interoperability layers for airline redemption and accrual services integrating multiple airline reservation systems.
- Participated in RFP discussions and solution architecture for high-speed rail loyalty, hospitality loyalty, and retail loyalty platforms.
- Implemented group loyalty solutions, large-scale member data migration programs, and performance optimization for one of the world’s largest loyalty member bases.

PRIOR WORK HISTORY

SOFTWARE DEVELOPER | Tiptap, USA | 2010 – 2011

SENIOR SOFTWARE APPLICATIONS DEVELOPER

Texas A&M University, Texas, USA | 2010 – 2010

REACH CONTACT | UIC, Chicago, USA | 2008 – 2010

ASSISTANT SYSTEMS ENGINEER

Tata Consultancy Services, India | 2005 – 2008

SKILLS

Enterprise Data & Analytics Strategy, Data Engineering, Data Mesh Architecture, AI Integration, GenAI & LLM Product Integration, Multi-Cloud Transformation, Advanced Analytics, Power BI Enablement, Low-Code / No-Code Data Platforms, Streaming & Real-Time Analytics, Digital Transformation, Data Modernisation, Enterprise Architecture, Microservices, Mobility, IoT & Connected Systems, DevOps, Observability & Reliability engineering, Performance Engineering, Infrastructure Automation, Cloud cost optimization, Technology Governance, Security & Compliance, Agile Program Delivery, Product Management, Executive Stakeholder Management, Vendor Management, Global Delivery, Cross-Functional Collaboration, Team Leadership, Communication Skills, Problem Solving, Data-Driven Decision Making

TECHNICAL SKILLS

- **Architecture & Platforms:**  
Digital & Data Architecture, Data Mesh, Microservices, Big Data, IoT, Cloud-Native Systems
- **Cloud & Data Stack:**  
AWS, Azure, GCP, Kubernetes, Databricks, Confluent Cloud, MongoDB Atlas
- **Programming Languages:**  
Java, Scala, Kotlin, Go, Python, JavaScript
- **Frameworks & Tools:**  
Apache Spark, Apache Flink, Kafka, Spring EE, Airflow, Temporal, Polars, Flutter
- **Web & APIs:**  
REST, GraphQL, gRPC, SOAP, JAX-RS, JAX-WS
- **Databases:**  
MySQL, PostgreSQL, MS SQL Server, Oracle, MongoDB
- **DevOps & Observability:**  
Docker, Helm, Jenkins, Git, Prometheus, Grafana
- **AI & GenAI:**  
OpenAI APIs, LangChain, LlamaIndex, Copilot , Claude Code
- **Agile & Delivery Tools:**  
Jira, Azure DevOps
